

Welcome to the inaugural PG Day!

VISION

Red Hat Technical Sales exists to **prove** Red Hat's **technical value** and market **differentiation**, with the **customer** at the center. We will do this through 1) Clarity of Purpose/Mission 2) Capability 3) Accountability 4) Consistency 5) Measured Impact So that we achieve **technical wins** and **accelerate adoption**, enabling **transformative** capabilities for our customers

Guiding Principles

Relevance

Radical Candor

Clarity

Continuous Improvement

CY26 Initiatives

Accelerate Platform Adoption - CSE

Our CSEs will orchestrate platform specific adoption led growth initiatives

1. 1 per platform per Q
2. Cross-sell lead pass and consumption accel
3. Secure Customer Success Stories

New Customer Acquisition - SSP

Our Sales Specialists will acquire new customers and beat the competition

1. # of new customers over \$1M, \$2M, \$5M
2. Technical Wins
3. Out-quarter Pipeline

Bring Technology to Life - SSA/SAA

Our Specialist Solution Architects and Specialist Adoption Architects will bring our technology to life through repeatable processes and tech

1. Tech Activities
2. Reusable Tech Artifact
3. Deployment verification via telemetry

Build for the Future - E-SSPs/E-SSAs

Our Emerging Technology Teams - AI, Virt, & Cloud Services - will work with our customers to find product/market fit and customer references

1. Inference / RH AI Attach Wins
2. Virt Wins 3. MCS Wins

Ignite Customer and Team Action - Primary Owner ASAs

Our Account Solution Architects will have deep knowledge and relationships to allow Red Hat to compete across our 6 TDPs and deliver outcomes for our customers

» CY26 Technical Sales Strategic Planning Assets

What's the Plan?

Improved information flow, alignment, and organizational discipline across the Americas Tech Sales organization leading to strategic advantage and improved customer/associate experience

Americas Tech Sales

VISION, PRINCIPLES, & PRIORITIES

One-pager summarizing the vision, principles, and simplified role-based priorities that span the pre and post sales TS orgs

PLATFORM GTM INITIATIVES

Market and customer facing go-to-market motions that will yield the largest return on investment to RH and our clients

OBJECTIVES & KEY RESULTS

Customer value-based objectives with measurable key results

THE TECH SALES EXPERIENCE

Process, communications, and recognition aimed at making the associate experience within Tech Sales second to none

LEADING IN TECH SALES

Tech Sales Leader guide to understand the expectations and opportunities for personal and career growth

Global Tech Sales

TECHNOLOGY DECISION POINTS

Critical technology decisions being made by our clients within the core markets we aspire to service

TECHNICAL ENGAGEMENT MODEL

Technical activity and orchestration guidance for our tech sales community of Red Hat associates (and partners?)

TECH SALES GUIDEBOOK

Annually published guidebook with roles and responsibilities, compensation, and other useful information related to Tech Sales

TECH SALES ENABLEMENT

Core certifications, emerging technologies exchanges, Red Hat One content, [Q1 focus](#)

CY26 SALES PLAYS & TACTICS

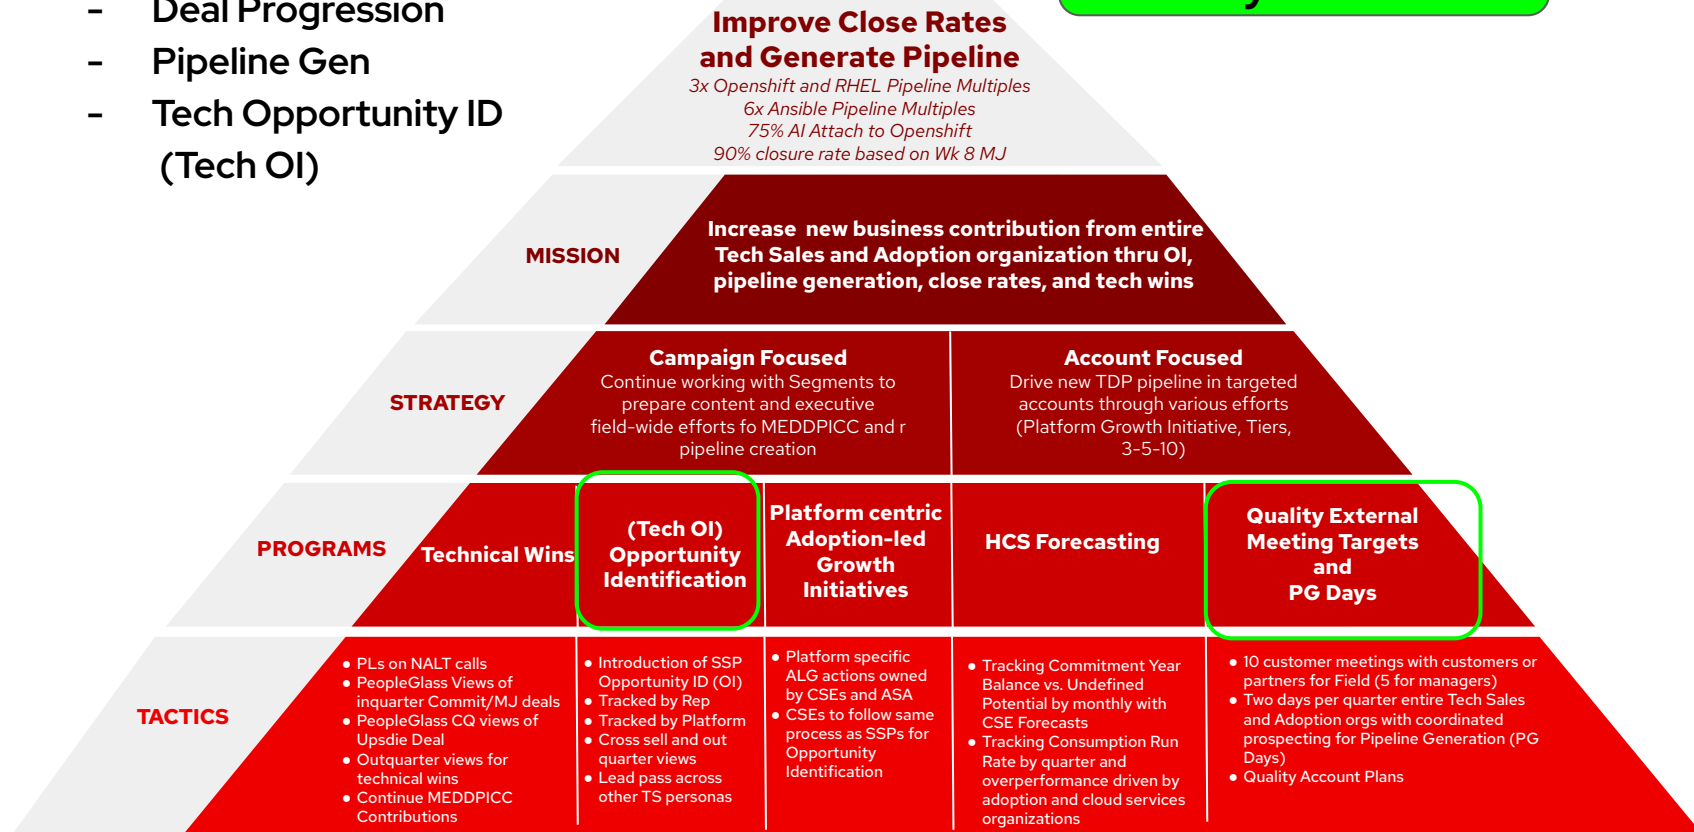

Plays and tactics that map to TDPs for use across regions

» Executing GTM Priorities

- Deal Progression
- Pipeline Gen
- Tech Opportunity ID (Tech OI)

New Business Pyramid

Red Hat Confidential

Example: Tiered Account Program Using Data to Drive Behavior

Scores map accounts to four strategic themes, or tiers, to focus resources on critical growth customers

High Bookings

Loyalty Accounts:

- Focus theme of **Protect the Core Revenue** or **Restart Growth Velocity**
- Has high revenue but has stalled in momentum
- Protect renewals or actively hunt for a catalyst that can turn the account into a Defend and Grow account
- Up-level across Red Hat platforms (i.e., RHEL to OpenShift)

Defend and Grow:

- Focus theme of **Intertwined Partnership** with the customer
- We are a strategic partner to the customer
- We co-engineer solutions and use them as global best-of-breed references
- We are embedded in the customer's long-term business outcomes

Limit Investment:

- Focus theme of **Maximize Operational Efficiency**
- Has low revenue and low velocity, meaning it is steady-state and requires minimal high-touch intervention
- Reallocate high-touch, specialized sales resources
- Use a minimal core team and keep the account healthy enough to catch an "Invest and Grow" signal if it appears
- Leverage digital content, channel partners, and automated processes for efficiency

Invest and Grow:

- Focus theme of **Aggressive Expansion**
- Has velocity (customer intent, opportunities, and compelling events) but lacks the revenue to classify as a Defend and Grow account
- High potential for growth to next tier
- Apply Red Hat resources here to accelerate deal closure: bigger deals + more deals
- Shift the customer into a multi-platform champion

Low Bookings

Low Velocity

High Velocity

Example: Platform Acceleration Initiative (SSPs should leverage for PG Day)

Sign up and test it out!!

⚡ Sales Assistant: The Quick Summary

Confidential

The Sales Assistant is your **AI-powered partner** designed to provide **real-time answers** on Red Hat products, buying programs, and sales processes, helping you close deals faster.

The Ask:

- **Use the Sales Assistant** in your regular workflow. We're looking for feedback on the quality/accuracy of your results as well as missing information. Your usage and feedback will drive future development of the roadmap.
- **HOW:** For every interaction, you should provide a Thumbs Up or Thumbs Down. If you use Thumbs Down, a comment is required, detailing what was wrong or what you expected. Find more detailed instructions [here](#).
- **WHO:** You! We're looking for volunteers now to help ensure that we're building the right features for our sellers.

Core Value:

- **Knowledge Base:** Instant access to product docs, sales materials, and process guides.
- **Deal Strategy:** Interactive tool recommends the **optimal buying program** (ESP, HCS, etc.) for a customer's specific needs.
- **Customer Intel:** Connects to [People.ai](#) (using SSO) for deep insights into accounts, their subscriptions and more!
- **Conversational Quoting:** Create and modify quotes, products, and discounts in real-time through a simple chat interface that integrates directly with Salesforce.

Additional Resources:

- [Sales Assistant: Gold Deck](#) - live deck including feature roadmaps, launch plans and more!
- [Sales Assistant Source Page](#) - includes info from the gold deck and also the sign up form to share with your colleagues.
- You can also add live questions to the [#forum-sales-assistant](#)

Getting started with RSH

Preparing content to share

View and share approved content with customers directly from RSH whenever you see the paper airplane.

Sharing from pages, workspace and search

Workspace - Your personal drive and place for collaboration

[Watch short video on Workspace Demo and other helpful RSH features](#)

SSA/SAA workspaces

1. Login to [RH Sale Hub](#) (RHSH)

The screenshot shows the Red Hat Sales Hub interface. The top navigation bar includes the Red Hat logo, 'Red Hat Sales Hub', a search bar, and user profile 'JC'. The left sidebar contains navigation icons for Home, DocCenter, Engagements, Insights, and Workspace (highlighted with a green arrow). The main content area is titled 'WorkSpace' and shows 'My files' and 'Shared with me' tabs. Below these are sorting options ('Sort: Last modified', 'Columns') and a table of files. The table has columns for Name, Last modified, Size, and Owner. One file is listed: 'Beyond Cost and Compliance: How Red Hat Is Shaping AI, Sovere...' with a size of 658 KB and owner Jason Corey. A green arrow points to the '+ New' button in the top right corner of the workspace area, which has opened a dropdown menu with options: 'Add content', 'Folder', 'URL', 'Video', 'Upload from computer', and 'Upload from external source'.

PLEASE READ
FULLY!

Lead Conversion – SSP

Other members of Tech Sales and Adoption Teams will be submitting leads during PG Day to you as the SSP and the AEs. This will prevent conflict where multiple members of the Tech Sales teams jockeying to create platform specific opportunities (e.g CSE or ASA creating an Ansible opp). To minimize duplication, SSPs are the only Tech Sales roles to create opportunities. All the rest of the Tech Sales team will submit leads which can then be converted to opportunities by the SSPs. Ecosystem teams please see your breakout session for details on Deal Registration and how that will be handled on PG Day!

What happens if I am creating a lead for a current POC already in Sales Cloud?

The goal of all our prospecting efforts is to expand into new lines of business, new contacts, and new personas. That said, if you have to pass a lead under a current POC you could

- a) Use a new email address to log the contact
- b) Contact your AE or SSP and have them enter your lead pass as an opportunity directly (without a formal lead being passed, this should be the exception)

Focus on leveraging new personas information in Sales Hub

What happens if I am creating a lead for a current POC already in Sales Cloud?

The goal of all our prospecting efforts is to expand into new lines of business, new contacts, and new personas. That said, if you have to pass a lead under a current POC you could

- a) Use a new email address to log the contact
- b) Contact your AE or SSP and have them enter your lead pass as an opportunity directly (without a formal lead being passed, this should be the exception)

Focus on leveraging new personas information in Sales Hub

1. Login to [RH Sale Hub](#) (RHSH)

The screenshot shows the Red Hat Sales Hub interface. The top navigation bar includes the Red Hat logo, 'Red Hat Sales Hub', a search bar, and user profile 'JC'. The left sidebar contains navigation icons for Home, DocCenter, Engagements, Insights, and Workspace (highlighted with a green arrow). The main content area is titled 'WorkSpace' and shows 'My files' and 'Shared with me' tabs. Below these are sorting options ('Sort: Last modified', 'Columns') and a table of files. The table has columns for Name, Last modified, Size, and Owner. One file is listed: 'Beyond Cost and Compliance: How Red Hat Is Shaping AI, Sovere...' with a size of 658 KB and owner Jason Corey. A green arrow points to the '+ New' button in the top right corner of the workspace area, which has opened a dropdown menu with options: 'Add content', 'Folder', 'URL', 'Video', 'Upload from computer', and 'Upload from external source'.

Partner Deal Registration Process Guide for PAMs

👤 Revised by Samuel Arango • 📅 about a month ago • 👁 136 Views

Audience:

Partner Account Manager (PAM)

Objective:

Partner Account Managers (PAMs) are essential to the deal registration process. While partners can register deals for any account on their approved Red Hat customer list, they frequently need to register new opportunities with customers not currently on that list, including entirely new Red Hat accounts. Your critical responsibility is to review these partner-submitted deal registrations and accurately assign them to the appropriate Red Hat customer account within your territory. To ensure an optimal partner experience, all sales teams are required to review, approve, or reject deal registrations **within 48 hours**.

Includes the following Deal Registration Procedures for PAMs:

Table of Contents

- [Procedure 1\) How to add a Deal Registration Opportunity to an account](#)
- [Procedure 2\) How to manually create a Deal Registration on Partner behalf](#)
- [Procedure 3\) How to create a new Partner Portal registration request for Red Hat associates \(on behalf of Partner users\)](#)
