

Elastic Content Kit

March 2026

Overview	
About	Elasticsearch is a distributed, free and open search and analytics engine for all types of data, including textual, numerical, geospatial, structured, and unstructured. Elasticsearch is built on Apache Lucene and was first released in 2010 by Elasticsearch N.V. (now known as Elastic). Known for its simple REST APIs, distributed nature, speed, and scalability, Elasticsearch is the central component of the Elastic Stack, a set of free and open tools for data ingestion, enrichment, storage, analysis, and visualization. Commonly referred to as the ELK Stack (after Elasticsearch, Logstash, and Kibana), the Elastic Stack now includes a rich collection of lightweight shipping agents known as Beats for sending data to Elasticsearch.
Value Proposition	Quickly discover in-depth analytics of your OpenShift environment with automation, machine learning, and the power of open standards to modernize your application development platform. Easily deploy Elastic on OpenShift in a highly available, secure, containerized architecture for large-scale infrastructures. Maximize your OpenShift investment with data lifecycle management and protect your data with always-on snapshots and cross-cluster replication.

Sales Material	
Collateral & Presentations	• Elastic Notebook • Battlecard • JVP • Product brief • Solution Brief • Container Management Content Kit • AI Content Kit • Elastic & Red Hat Openshift AI • Why Use Elasticsearch as a Vector Database • Sales Enablement: GTM

	• Elastic TDP Alignment
Videos & Recordings	• Welcome to a World of Possibility with Elastic • Elastic & Red Hat Openshift AI
Blogs, Podcasts, & PR	• RAG for GenAI • Red Hat extends collaboration with Elasticsearch vector database for Red Hat OpenShift AI • Elasticsearch is Open Source Again • Demystify RAG with OpenShift AI and Elasticsearch • Elastic Announces AI Ecosystem to Accelerate GenAI Application • Accelerating AI Innovation: Introducing the Elastic AI Ecosystem • Elastic and Red Hat: Accelerating public sector AI and machine learning initiatives • Use Case - Enhancing Financial Analyst Efficiency Through RAG-Powered Search with Elasticsearch • Enhancing workflow efficiency with Elasticsearch and Red Hat Openshift AI • Get Set,build: Red Hat Openshift AI applications powered by Elasticsearch vector database • Elastic and Red Hat: Scaling the sovereign AI factory with NVIDIA GPU acceleration
Technical Sales Material	
Catalog Listings	• Ecosystem Catalog Listing • OpenShift Certified Operator • RHEL Documentation
Technical Resources	• Elastic Technical Content • RAG: Retrieval Augmented Generation, Elastic + Openshift AI • The Elastic AI Ecosystem • Validated Patterns as a vector DB to RAG LLM
Case Studies	
Additional Resources	• Elastic and Red Hat Carahsoft Technology Spotlight • Run Secure Applications in Disconnected Environments • Elastic Notebook
Websites	
Partner website	• https://www.elastic.co/
Red Hat Marketplace	• Marketplace listing
